To Whom It May Concern;

As the Vice-President of Programs for the Milwaukee Chapter of the Association for Facilities Engineering (AFE), I have the utmost confidence that the Wisconsin Association Management LLC (WAM) will serve you well as an association management team.

AFE has been in existence in Milwaukee since 1954, and has approximately 112 members. As a certified plant engineer, I have been a part of the organization for more than twelve years. Since we have been working with the staff at WAM, there seems to be more of a spark to our communications. The administrative assistance that AFE is receiving from WAM has been quite a welcome relief.

I am satisfied that our partnership has been and will continue to be successful. Should you have any specific questions about the benefits of having WAM as a management extension of your organization, give me a call.

Sincerely,

A handwritten signature in cursive script that reads 'Mike Fegley'.

Mike Fegley
Vice-President, AFE
